

Pairing the CA 9780

*The wireless camera kit CA 9780 automatically comes paired.
However in some cases this pairing may be come disrupted and re-pairing is needed.
This kit only takes one wireless camera, a second additional camera can be wired if needed.*

GUIDELINES FOR PAIRING THE CA 9780

Tools needed:

A screw driver & a paper clip unfolded.

1. Power on both the camera & the monitor making sure both antennas are attached.
2. Unscrew the silver screw beside "PAIR" on the back on the camera

3. Press **Mode** on the monitor until **CAM 2** appears top right.

4. Next Press **Menu** & keep pressing to scroll through the options until "Pair OFF" appears.

5. Press the Arrow ► button to turn the "Pair On".

"Please press pair key on Camera " Appears on screen

This will automatically search for a pairing device for 30 seconds.

6. Take the paper clip and press the button on the camera, from where the silver screw was removed, until you hear the click, hold for **3-5 seconds**, until the monitor shows its paired.

Image from the camera will now be displayed on the monitor.

Note when replacing the silver screw don't tighten too much to knock off the pairing.
